Projects

Little Light: The final project of the foundations year, written in Python using the PyGame module. This is a simple platformer game consisting of 5 levels.

<https://github.com/MenacingManatee/LittleLight>

Unity VR Room: First major VR project of specializations year, this project is a basic puzzle game where the user has to interact with the environment in order to make it to the next room. Created in Unity and using C#.

https://github.com/MenacingManatee/Ox0B-unity-vr_room

Printf: A team implementation of printf created as part of Holberton School curriculum, this project was written in C, and was the first major team project in my education..

<https://github.com/MenacingManatee/printf>

Booker T Washington / High School Diploma

August 2011 - May 2015, Tulsa

Holberton School / Certificate of Completion

January 2020 - September 2021, Tulsa

Education focused on project-based learning with a curriculum designed by industry leaders. Students are taught to teach themselves how to learn, with software engineers on campus we can come to with questions, but no instructors or lectures.

Certificate is for a full stack developer, and includes a specialization in AR/VR development

Goodwill / ADC Attendant

July 2018 - PRESENT, Tulsa

- Sorted through thousands of pounds of donations each day unsupervised.
- Greeted 50-90 donors daily while maintaining a professional demeanor.

Indigo Promotions / Campaign Manager

January 2018 - July 2018, Tulsa

- Drive sales through marketing and management techniques, responsible for roughly 1/5 of the total sales.
- Provide daily feedback for team through reviews.
- Conduct 2-4 interviews weekly.
- Supervise 1-5 individuals in the office and the field.

Reasors / Cake Decorator

July 2015 - December 2017, Tulsa

- Prioritize and fulfill 8-20 custom cake orders daily.
- Create dozens of unique cakes as required to stock the sales floor, back stock, and display cases.
